"Swing Pivot Trend Rotations"

Main Features

Included files:

       HTa_SwingPivotTrendRotationsV1.txt
       HTs_SwingPivotTrendRotationsV1.txt
       HTw_SwingPivotTrendCountV1.txt
       HTw_SwingPivotTrendColorV1.txt
       HTb_SwingPivotTrendRotationsV1.txt

1. Chart Study
    1. Displays Four Trend Stages
        1. Max Bullish
        2. Min Bullish
        3. Neutral
        4. Min Bearish
        5. Max Bearish
    2. Trend stages are determined using swing pivot structures
        1. Major swing pivots identify larger trend structures
        2. Minor swing pivots identify smaller trend structures (the trend within the trend)
        3. Trend rotations are observed on the chart as trend reversals take shape
    3. Adjust left and right strength of both major and minor swing pivot structures
2. Custom Scan
    1. Trend Status
        1. Scan for specific trend stages
    2. Trend Bar Count
        1. Scan for consecutive bars of current trend (single value or range of values)
3. Custom Watchlist Column
    1. Trend Status Color
        1. Changes color of each cell showing the current trend status
    2. Trend Status Bar Count
        1. Displays a numeric value of consecutive bars of current trend
4. Chart Strategy
    1. Everything included in the Chart Study, plus the following…
    2. Plots theoretical buys and sells (strategy orders) on the chart
    3. Strategy orders are used for back-testing and optimizing your trade setups
    4. Strategy order entry types:
        1. Major Bullish Long Entry
        2. Major Bearish Short Entry
        3. Both
        4. Minor Bullish Long Entry
        5. Minor Bearish Short Entry
    5. Filter out signals when price is overbought or oversold
        1. Select either RSI or Stochastic OB/OS element
        2. For Stochastic, select between FullD and FullK
        3. Adjust overbought/oversold levels
    6. Strategy order exit types:
        1. Changes from bullish to minor bearish trend
        2. Changes from bearish to minor bullish trend
        3. Changes from any bullish trend to any bearish trend
        4. Changes from any bearish trend to any bullish trend
    7. Intraday Time Frame Options:
        1. Adjust trading hours start and end time
        2. Adjust Flatten Position Time (to post exit signals before end of trading session)
    8. Trade Size (Shares or Equity)
        1. If set to "Shares", adjust "Trade Shares" to desired qty
        2. If set to Equity, adjust "Account Equity" and "Percent of Equity"
