"Swing Pivot Trend Rotations"

<u>Is this indicator package for you?</u>

1. Do I already use Support/Resistance levels and/or swing high/low pivots in my trading setups?

2. Does my current trading setup include criteria for overbought/oversold conditions?

3. Do I typically identify trend direction based on the structure of the price action?

4. Do I believe that back-testing my setups will help me be a better trader?

5. Am I willing to put in the time and effort to perform exhaustive back-testing and analyze the results to find optimum parameters for my setups?
